

Buy an Ultra Low Temperature Freezer at interesting conditions !!! *

The [MDF-DU702VH VIP ECO](#) ultra-low temperature freezer, minimizes energy consumption, offers maximum storage capacity, reduces environmental impact and saves money.

VIP ECO

Natural Refrigerants -86°C Upright Freezer

- ✓ Natural hydrocarbon refrigerants
- ✓ Inverter compressors
- ✓ Low carbon footprint
- ✓ Volume: 729 L
- ✓ Storage capacity : 576 x 2 inch boxes
- ✓ Sample Inventory Racks available upon request

Inverter compressors

While conventional freezers use single speed compressors which cycle on and off, the [MDF-DU702VH VIP ECO](#) ultra-low temperature freezer contains inverter compressors that can run at different speeds to maximise cooling performance under different conditions, resulting in a more efficient energy consumption and lower heat dissipation.

Efficient refrigeration, environmentally friendly and flexible sample storage

The combination of VIP PLUS vacuum insulation and an enhanced cabinet design with insulated outer door, ensures optimum temperature uniformity, while the reduced wall thickness maximizes storage capacity. The extensive range of sample inventory racks offers you a wide variety of storage solutions.

The natural hydrocarbon refrigerants combined with this VIP insulation technology also helps the environment, by reducing its carbon footprint.
